The Healthy Schools Act of 2000 was signed into law September 2000 in which all schools provide written notification of expected pesticide applications on school sites. The notification will identify the active ingredient or ingredients in each pesticide product and will include the internet address (http://www.cdpr.ca.gov) for further information on pesticides.

Staff members may request prior notification of individual pesticide applications at their school site. Those listed on this registry will be notified at least 72 hours prior to pesticide applications by postcard detailing the date, time, and pesticides to be used.

If you would like to be notified, please register at the District website under Departments:

Select Operations/Grounds
Select Integrated Pest Management on the left side of the page
Scroll to the bottom of the webpage and select Click here to register to receive pesticide application notices.

Registration is done on an annual basis and does not carry over year to year.

If you do not have internet access and wish to register, please ask your school site to register for you.

If you have any questions, please call (714) 424-7560.
